

Assistive Technology for the Visually Impaired at the Clarence Public Library

Digital Talking Book Player

This easy-to-use player is for use in the library to listen to recorded books provided by the Talking Book and Braille Library.

The small collection of books available in-house is periodically updated. Many more are available through the TBBL.

Optelec Clearview 300 Video Magnifier

A low vision reader magnifier with a black and white 17" monitor designed to help the visually impaired with everyday tasks such as reading books and magazines, viewing photographs, bills, letters, or other writing. Donated by the Lions Club of Clarence.

Aladdin Classic

The Aladdin's large viewing platform permits reading heavy books and full sheets of paper. High-contrast black text on a white background or white text on a black background. 14-inch screen and 4.5x magnification. Funded by the Lions Club of Clarence.

Enhanced Vision Pebble HD Portable Video Magnifier

A portable handheld video magnifier with high-tech features for enlarging and enhancing images. These include an LCD light, a built-in camera, and a "freeze image" function for capturing magnified text and graphics. Purchased with funds provided by the Lions Club of Clarence.
