- **Go think:** We upgraded the wooden blocks to be lighter than similar products that use pine wood on the market for smooth playability. The lightweight wood with smooth edges made removing the wooden block at the bottom easy. It could start at 1.8FT and grow up to a 4 FT tall tower when played. In addition, the blocks are pretty light, so nobody will get hurt when it topples over.
- The wood is certified by the Forest Stewardship Council (FSC) and meets universal sustainability standards. All the materials, including bags, wood, etc., pass the toy safe test of EN71 (European Toy Safety Standard) and ASTM (American Toy Safety Standard).
- The jumbo tower is an intelligent Game to cultivate patience, persistence, and creativity, which can make the party games lively and provide entertainment for your family and friends. It improves hand-eye coordination, balance, self-control, and fine motor skills. In addition, you can create your own rules or bonus rules. The tumbling game encourages interactive play, reduces screen time, and is a perfect way for parents and kids to bond over hours of fun.
